

# ACRYLIC SIGNS 'PERSPEX/PLEXIGLAS'

**COMMON USES:** Extinguisher, Fire Blanket, Location, Hose Reel, Offences, Warning, Hydrant, Sprinkler, ID, Alarm, Warning Signs etc..

FlameStop offer Acrylic prints for your more important installations which may require a more stylish finish. Our Acrylic signs are printed on quality high gloss material with a luxury finish. The perfect professional luxury finish especially when installed with our metal stand off mounts.

## About our Acrylic signs...

### What are your Acrylic signs made from?

Our Acrylic signs are made from 3mm cast Acrylic sheets. Acrylic is a widely used, highly versatile plastic and can be used in signs because of its outstanding weather-ability, long lifespan, excellent clarity and can also be recycled easily. We stock 3mm thickness in clear and white Acrylic. And also 4mm in clear.

### How are they printed?

We direct print Acrylic using state-of-the-art UV-LED technology. For clear Acrylic signs, we can reverse print onto the back of the sheet, then print a final coat of white ink over the top. When you flip the sheet over, the result is a beautifully finished sign, where the ink remains protected behind the clear sheet itself.

### How do I install Acrylic signs?

Dependant on the location, surface and durability requirements, Acrylic can be installed using the following methods:

- Acrylic, foam or UHB double sided tape (on white acrylic only)
- Silicone or construction adhesive (on white acrylic only)
- Direct mounted with any self tapping, button, rounded or flat headed screws
- Stand-off mounts (recommended)

### Do I need lamination?

Over laminating or liquid laminating your signs will help protect against scratches, harsh weather as well extending UV life. Laminating adds approximately 1-2 years and produces a more durable 'outdoor' sign.

### What sizes can I have?

Any size, small or large, there are no limits.

### Can I have a custom shaped sign?

Yes, talk to your local representative for pricing.

### Are your signs double sided?

Our standard Acrylic signs are printed on one side only. We can print on both sides if required.

### Are your Acrylic signs waterproof?

Yes, our signs can be exposed to water and wiped clean. (Chlorine may discolour signs over time).

### Is Acrylic durable?

Acrylics highly polished surface quality is achieved by casting against glass. Acrylic has long term weather resistance with no colour discolouration allowing 92% transmission of light. Acrylic has a very good resistance to weak acids and alkalis.

Acrylic has 10x the impact resistance of glass, but will crack if impacted violently.

### Will my Acrylic sign warp?

No, Acrylic has outstanding UV resistance, temp range: Up to +75°C, +90°C short term.

### Can I have holes/rounded corners?

Yes

### Does your Acrylic come with fixings?

No, as we do not know where these signs are to be installed, no fixings or tape are included.

### Can I add my logo or contact info?

Yes, on customised sign orders.

**FlameStop**Signs

Clear Acrylic printed underneath finished with white

White cast Acrylic available in 3mm

Polished and brushed standoffs available in 12mm

## GENERAL SIGNAGE FAQ.

### What type of signs do you make?

We can make most types of signs on a wide variety of materials.

### Can you make a customised sign?

Yes, just contact us with your specific requirements.

### Do you provide proofs?

Yes, once you place an order we can provide a proof.

### How much does it cost?

Each sign is different, the cost depends on materials used, print process and how many you want? We can quickly quote you.

### Do you install?

No sorry.

### Do your signs conform to standards?

Yes, specifications and colours for our signs and stickers are produced in accordance to AS1319:1994

### Can you print from my own artwork.

Yes we can print from your files (see 'Supplying Artwork Guide'). Note: conformity and compliance becomes client responsibility.

### I don't have any artwork.

Simple artwork is free of charge, more complex artwork may incur an artwork fee, you will be notified in advance.

### How quick can you produce my sign?

Most signs and stickers in our catalogue we keep in stock nationally. If your sticker is uncommon or customised allow 3-5 working days.

### How long do your signs last?

This highly depends on where the sign is installed. Indoors, out of direct sunlight minimum 5+ years. Outside in direct sunlight 1-3 years before the sign will start to fade. We can also laminate signs to protect and extend their life by an additional 1-2 years.

### Can you make signs same day?

Yes, we offer a same day turnaround and also a next day service, additional costs apply, speak to your local representative.

### Does your cost include GST?

No, please add 10% GST onto all prices.

### Does your cost include freight?

No, but we can provide a freight quote or you can collect direct.
