

# VINYL STICKERS 'DECALS/LABELS'

**COMMON USES:** Extinguisher, Fire Blanket, Location, Hose Reel, Offences, Warning, Hydrant, Sprinkler, ID, Alarm & Fire Door Stickers etc..

FlameStop offer a wide range of safety stickers for the majority of your installations and requirements. Our stickers are printed on quality vinyl material with permanent adhesive for a fast and perfect install.

## About our stickers...

### What are your stickers made from?

Our stickers are made from high quality 3-5 year self adhesive vinyl.

### How long do they remain sticky?

The permanent clear adhesive has a life of 5+ years. The rear of the sticker has a grey back to ensure you can install with no 'show through'.

### How long can I keep them for?

Stickers should be stored at room temperature and applied within 6 months of purchase.

(Note: do not store inside vehicles which can get hot and adversely affect the adhesive properties).

### How are they printed?

Our popular selling stickers are screen printed. Customised or short run stickers orders are printed using state-of-the-art UV-LED technology.

### Will they fade in the sun?

Generally an 'unlaminated' sticker will last 1-3 years outdoors and minimum 5+ years indoors.

### How do I install sticker signs?

Wash the wall or surface with soap and water, then remove any residue by wiping area with Isopropyl or Alcohol. Lift off sticker by peeling one of the corners and using squeegee firmly apply to the surface pushing out any bubbles from the centre.

### Are your stickers waterproof?

Yes, our stickers can be exposed to water and wiped clean. (Chlorine may discolour signs).

### Can you make reflective stickers?

Yes, we produce reflective safety class 1 & 2 stickers and can also mount onto substrates.

### What sizes can I have?

Any size small or large, there are no limits.

### Are your stickers durable?

Installed on a correctly prepared surface, adhesion will be excellent and should last many years without peeling.

### Do I need lamination?

Printed ink can scratch if aggressively grazed. Over laminating your stickers will help protect against scratches, harsh weather as well extending UV life. Laminating adds approximately 1-2 years and produces a more durable 'outdoor' sticker.

### Can I add my logo or contact info?

Yes, on customised sticker orders.

### Are your stickers supplied on a roll?

No, our stickers are either supplied individually or in sheet sizes of approx A4. We plan on supplying stickers on rolls soon.

### Can you print 'Fire Door' & 'Service' stickers?

Yes, see our 'Service Sticker' and 'Fire Door' information sheets.

### Can you print barcodes?

Yes, we can print 'Code 39' barcodes, contact your local representative for more info and prices.

### Can you print variable data?

Yes, we can print sequential numbers, names and graphics contact your local representative for more info and prices.

### Can you print custom shapes?

Yes, we can print and cut any shape or size sticker you require, see our 'Service Sticker Sample' information sheet.

 **FlameStop**Signs

Stickers with grey back for no 'show through'

Permanent adhesive for long term install

Optional lamination for extra UV resistance

## GENERAL SIGNAGE FAQ.

### What type of signs do you make?

We can make most types of signs on a wide variety of materials.

### Can you make a customised sign?

Yes, just contact us with your specific requirements.

### Do you provide proofs?

Yes, once you place an order we can provide a proof.

### How much does it cost?

Each sign is different, the cost depends on materials used, print process and how many you want? We can quickly quote you.

### Do you install?

No sorry.

### Do your signs conform to standards?

Yes, specifications and colours for our signs and stickers are produced in accordance to AS1319:1994

### Can you print from my own artwork.

Yes we can print from your files (see 'Supplying Artwork Guide'). Note: conformity and compliance becomes client responsibility.

### I don't have any artwork.

Simple artwork is free of charge, more complex artwork may incur an artwork fee, you will be notified in advance.

### How quick can you produce my sign?

Most signs and stickers in our catalogue we keep in stock nationally. If your sticker is uncommon or customised allow 3-5 working days.

### How long do your signs last?

This highly depends on where the sign is installed. Indoors, out of direct sunlight minimum 5+ years. Outside in direct sunlight 1-3 years before the sign will start to fade. We can also laminate signs to protect and extend their life by an additional 1-2 years.

### Can you make signs same day?

Yes, we offer a same day turnaround and also a next day service, additional costs apply, speak to your local representative.

### Does your cost include GST?

No, please add 10% GST onto all prices.

### Does your cost include freight?

No, but we can provide a freight quote or you can collect direct.

# PLASTIC SIGNS & ANGLED SIGNS

**COMMON USES:** Extinguisher, Fire Blanket, Location, Hose Reel, Warning, Hydrant, Sprinkler, ID, Alarm & WIP Signs etc..

FlameStop offer a range of flat plastic signs and angled signs which are thicker and more rigid. Angle signs are perfect for perpendicular installations where visibility is a priority from both directions.

## About our plastic signs...

### What are your plastic signs made from?

Our flat plastic signs are made from a high quality, white, 0.6mm rigid PVC sheet material. The angled signs are made from thicker 1mm rigid PVC sheet material.

### How are they printed?

Our popular selling plastic signs are screen printed. Customised or short run sign orders are printed using state-of-the-art UV-LED technology.

### How do I install plastic signs?

Dependent on the location, surface and durability requirements, plastic signs can be installed using the following methods: (We recommend the screw method for angled sign installations).

- Acrylic, foam or UHB double sided tape
- Silicone or construction adhesive (e.g. liquid nails)
- Direct mounted with any self tapping, button, rounded or flat headed screws
- Adhesive Velcro mounting
- Stand-off mounts

### Do I need lamination?

Over laminating your signs will help protect against scratches, harsh weather as well extending UV life. Laminating adds approximately 1-2 years and produces a more durable 'outdoor' sign.

### What sizes can I have?

Any size small or large, there are no limits.

### Can you make reflective plastic signs?

Yes, we can mount reflective safety class 1 & 2 vinyl onto any plastic sign.

### Are your signs double sided?

Our standard flat signs are printed on one side only. Our angle signs are printed on both sides.

### Are your signs waterproof?

Yes, our signs can be exposed to water and wiped clean. (Chlorine may discolour signs over time).

### Is PVC plastic durable?

PVC is resistant to acid, alkali and almost all inorganic chemicals. It is rigid and tough, but will crack if impacted hard.

### Will my plastic sign go yellow?

No, but PVC will generally weather over time. There will be some printed discolouration over time.

### Will my plastic sign warp?

If subjected to excessive weather/heat, any PVC sign will warp especially over time. If the location of the sign is situated in a harsh environment, we recommend a more durable laminated ACM sign.

### Do your plastic signs come with any fixings or tape?

No, as we do not know where these signs are to be installed, no fixings or tape are included.

### Can I add my logo or contact info?

Yes, on customised sign orders.

### Does your cost include GST?

No, please add 10% GST onto all prices.

### Does your cost include freight?

No, but we can provide a freight quote or you can collect direct.

# COMPUTER CUT STICKERS

**COMMON USES:** Extinguisher, Fire Blanket, Location, Hose Reel, Offences, Warning, Hydrant, Sprinkler, ID & Alarm Vinyl Cut Stickers etc..

FlameStop offer a wide range of vinyl cut stickers for the majority of your installation requirements. Our stickers are cut from quality vinyl material with permanent adhesive for a fast and perfect install.

## About our Vinyl Cut...

### What are vinyl cut stickers?

Vinyl cut stickers are cut to shape, this eliminates the need for printing inks and background material. Vinyl cut stickers are also called Computer Cut Decals and Die-Cut Decals.

### What are your vinyl cut stickers made from?

Our stickers are made from high quality 3-5 year, self adhesive vinyl in a variety of colours.

### How long do they remain sticky?

The permanent clear adhesive has a life of 5+ years.

### How long can I keep them for?

Stickers should be stored at room temperature and applied within 6 months of purchase. (Note: do not store inside vehicles which can get hot and adversely affect the adhesive properties).

### How are vinyl cut graphics produced?

Your chosen vinyl colour is loaded into our computer cutting machine, the letter/graphic shapes are physically cut out of the vinyl with a sharp blade. The excess vinyl is removed and the letters/graphics are mounted on to application tape ready for install.

### Will they fade in the sun?

No, generally a computer cut sticker will last 3-5 years outdoors and minimum 8+ years indoors.

### Are your stickers durable?

Installed on a correctly prepared surface, adhesion will be excellent and should last many years without peeling.

### What sizes can I have?

Any size small or large, there are no limits.

### How do I install vinyl cut stickers?

Wash the wall or surface with soap and water, then remove any residue by wiping area with Isopropyl or Alcohol. Lift off application tape by peeling one of the corners. The tape should now have the cut letters/graphic attached to it. Using a squeegee firmly apply to the surface pushing out any bubbles from the centre. Tip: Make the application easier by spraying the surface with water prior to install.

### Can you make reflective stickers?

Yes, we can produce computer cut reflective safety Class 1 & 2 stickers.

### Are vinyl cut stickers waterproof?

Yes, our stickers can be exposed to water and wiped clean.

### Are vinyl cut stickers reusable?

No, removing vinyl cut stickers will cause them to stretch and tear.

### Can I laminate vinyl cut?

No, we do not generally laminate vinyl cut stickers.

### Can I add my logo or contact info?

Generally no, but it can be done.

### Are your stickers supplied on a roll?

No, our computer cut graphics are supplied flat or rolled into a tube for transport.

**FlameStop**Signs

Mounted onto clear application tape

Peeled and ready for installation

A variety of colours in stock

### Standard Vinyl colours

Other colours available. Minimum quantity may apply.

## GENERAL SIGNAGE FAQ.

### What type of signs do you make?

We can make most types of signs on a wide variety of materials.

### Can you make a customised sign?

Yes, just contact us with your specific requirements.

### Do you provide proofs?

Yes, once you place an order we can provide a proof.

### How much does it cost?

Each sign is different, the cost depends on materials used, print process and how many you want? We can quickly quote you.

### Does your cost include freight?

No, but we can provide a freight quote or you can collect direct.

# ACM/METAL SIGNS

## ALUMINIUM COMPOSITE MATERIAL

**COMMON USES:** Extinguisher, Fire Blanket, Location, Hose Reel, Offences, Warning, Hydrant, Sprinkler, ID, Alarm, Warning Signs etc..

FlameStop offer a wide range of ACM signs for the majority of your installations. Our metal signs are printed on quality ACM ready for direct mounting for the perfect quick install.

## About our ACM signs...

### What are our ACM signs made from?

Our ACM signs are made from 3mm Aluminium Composite (also known by the trade names of Dibond, Alucobond and Alupanel). It consists of two thin sheets of Aluminium enclosing a Polyethylene core. ACM is half the weight of aluminium.

### How are they printed?

We direct print these signs using state-of-the-art UV-LED technology.

### How do I install ACM signs?

Dependent on the location, surface and durability requirements ACM signs can be installed using the following methods:

- Acrylic, foam or UHB double sided tape
- Silicone or construction adhesive (e.g. liquid nails)
- Direct mounted with any self tapping, button, rounded or flat headed screws
- Adhesive Velcro mounting
- Stand-off mounts (recommended)

### Do I need lamination?

Over laminating or liquid laminating your signs will help protect against scratches, harsh weather as well extending UV life. Laminating adds approximately 1-2 years and produces a more durable 'outdoor' sign.

### What sizes can I have?

Any size, small or large, there are no limits.

### Can I have a custom ACM shaped sign?

Yes, talk to your local representative for pricing.

### Can I have holes/rounded corners?

Yes

### Can you make reflective ACM signs?

Yes, we can mount reflective Safety Class 1 & 2 vinyl onto ACM.

### Are your signs double sided?

Our standard signs are printed single sided. We can provide double sided ACM prints for special orders if required, contact your local representative.

### Are your ACM signs waterproof?

Yes, our signs can be exposed to water and wiped clean. (Chlorine may discolour signs over time).

### Is ACM durable?

ACM is incredibly durable and strong and used widely in construction and furniture manufacture. It has an exceptional finish and retains its structural integrity when cut into shapes. Although very strong, it will dent if impacted hard, but not break.

### Will my ACM discolour?

No

### Will my ACM sign warp?

If installed on posts they will only dent or warp if placed in a high wind area.

### Do your ACM signs come with any fixings or tape?

No, as we do not know where these signs are to be installed, no fixings or tape are included.

### Can I add my logo or contact info?

Yes, on customised sign orders.

### Do your signs conform to standards?

Yes, specifications and colours for our signs and stickers are produced in accordance to AS1319:1994

### Can you print from my own artwork.

Yes we can print from your files (see 'Supplying Artwork Guide'). Note: conformity and compliance becomes client responsibility.

### I don't have any artwork.

Simple artwork is free of charge, more complex artwork may incur an artwork fee, you will be notified in advance.

### How quick can you produce my sign?

Most signs and stickers in our catalogue we keep in stock nationally. If your sticker is uncommon or customised allow 3-5 working days.

### Does your cost include freight?

No, but we can provide a freight quote or you can collect direct.

# REFLECTIVE SIGNS

**COMMON USES:** Ideal in poorly lit areas and general night time conditions: Street Signs, Mining Sites, Warning, Warehouse, Alarm & Fire Signs etc..

FlameStop offer a range of reflective signs for a variety of installations. Our signs are printed on reflective vinyl or can be mounted on ACM to create a durable, high visibility, professionally finished solid sign. We can mount on other substrates upon request, such as foam, Corflute or Aluminium.

## About our reflective signs...

### What are reflective signs made from?

Our reflective signs are made from Class 1 or 2 reflective vinyl. They can be optionally mounted onto 3mm ACM sheeting. We can also mount onto other substrates.

### How are they printed?

We direct print both these signs using state-of-the-art UV-LED technology.

### What is the difference between the two types of reflective?

The first type with the least amount of fluorescence is 'engineer grade' Class 2 reflective. This reflective is also the cheapest.

The second type of fluorescent material is 'high intensity grade' Class 1 reflective. This contains three times the amount of reflectivity of engineer grade. This reflective uses prismatic technology to offer superior visibility when viewed at an angle.

### How do I install ACM signs?

Follow 'sticker installation' instructions for vinyl installations.

For mounted reflective, dependent on the location, surface and durability requirements, reflective signs can be installed using the following methods:

- Acrylic, foam or UHB double sided tape
- Silicone or construction adhesive (e.g. liquid nails)
- Direct mounted with any self tapping, button, rounded or flat headed screws
- Adhesive Velcro mounting
- Stand-off mounts

### Can I have holes/rounded corners?

Yes

### Do I need lamination?

Over laminating your reflective signs will help protect against scratches, harsh weather as well as extending UV life.

We would not however recommend laminating the reflective signs as it would directly impact the performance of the sign.

### What sizes can I have?

Any size, small or large, there are no limits.

### Can I have a custom shaped sign?

Yes, talk to your local representative for pricing.

### Are your signs double sided?

Our standard signs are printed single sided. We can provide double sided reflective signs for special orders if required.

### Are your reflective signs waterproof?

Yes, our signs can be exposed to water and wiped clean. (Chlorine may discolour signs over time).

### Do your reflective signs dent or warp?

If installed on posts they will only dent or warp if placed in a high wind area.

### Will the sign rust?

No

### Do your reflective signs come with any fixings or tape?

No, as we do not know where these signs are to be installed, no fixings or tape are included.

### Can I add my logo or contact info?

Yes, on customised sign orders.

Class 1 - High Intensity Grade Reflective

Class 2 - Engineer Grade Reflective

Polished and brushed standoffs available in 12mm

## GENERAL SIGNAGE FAQ.

### What type of signs do you make?

We can make most types of signs on a wide variety of materials.

### Can you make a customised sign?

Yes, just contact us with your specific requirements.

### Do you provide proofs?

Yes, once you place an order we can provide a proof.

### How much does it cost?

Each sign is different, the cost depends on materials used, print process and how many you want? We can quickly quote you.

### Do you install?

No sorry.

### Do your signs conform to standards?

Yes, specifications and colours for our signs and stickers are produced in accordance to AS1319:1994

### Can you print from my own artwork.

Yes we can print from your files (see 'Supplying Artwork Guide'). Note: conformity and compliance becomes client responsibility.

### I don't have any artwork.

Simple artwork is free of charge, more complex artwork may incur an artwork fee, you will be notified in advance.

### How quick can you produce my sign?

Most signs and stickers in our catalogue we keep in stock nationally. If your sticker is uncommon or customised allow 3-5 working days.

### How long do your signs last?

This highly depends on where the sign is installed. Indoors, out of direct sunlight minimum 5+ years. Outside in direct sunlight 1-3 years before the sign will start to fade. We can also laminate signs to protect and extend their life by an additional 1-2 years.

### Can you make signs same day?

Yes, we offer a same day turnaround and also a next day service, additional costs apply, speak to your local representative.

### Does your cost include GST?

No, please add 10% GST onto all prices.

### Does your cost include freight?

No, but we can provide a freight quote or you can collect direct.

# FOAM/CORFLUTE SIGNS 'FOAMX/COREX'

**COMMON USES:** Extinguisher, Fire Blanket, Location, Hose Reel, Offences, Warning, Hydrant, Sprinkler, ID, Alarm, Warning Signs etc..

FlameStop offer a wide range of Foam and Corflute prints for your budget, short term installations. Our signs are printed on quality Foam and Corflute ready for direct mounting.

## About our lightweight signs...

**FlameStop**Signs

### What are your Foam signs made from?

Our foam signs are made from a lightweight, high quality, white, 3mm rigid PVC foam board.

### What are your Corflute signs made from?

Our Corflute signs are made from a 3mm extruded twin wall, corrugated polypropylene. A high quality fluted plastic which is lightweight yet rigid. Usually white, but other colours and thicknesses are available on request.

### How are they printed?

We direct print both these signs using state-of-the-art UV-LED technology.

### How do I install these signs?

Dependant on the location, surface and durability requirements, both signs can be installed using the following methods:

- Acrylic, foam or UHB double sided tape
- Silicone or construction adhesive (e.g. liquid nails)
- Direct mounted with any self tapping, button, rounded or flat headed screws
- Adhesive Velcro mounting
- Stand-off mounts

### Do I need lamination?

Over laminating your signs will help protect against scratches, harsh weather as well extending UV life. Laminating adds approximately 1-2 years and produces a more durable 'outdoor' sign.

### What sizes can I have?

Any size small or large, there are no limits.

### Can you make reflective signs?

Yes, we can mount reflective Safety Class 1 & 2 vinyl onto Foam and Corflute.

### Are your signs double sided?

Our standard flat signs are printed on one side only. We can print on both sides if required.

### Are your signs waterproof?

Yes, our signs can be exposed to water and wiped clean. (Chlorine may discolour signs over time).

### Is Foam & Corflute durable?

Both materials are exceptionally strong, rigid and tough, but will dent if impacted.

### Will my plastic sign go yellow?

No, but Foam and Corflute will generally weather over time. There will be some degree of printed discolouration over time.

### Will my sign warp?

If subjected to excessive weather/heat, Foam or Corflute sign will warp, especially over time. If the location of the sign is situated in a harsh environment, we recommend a more durable laminated ACM sign.

### Do your signs come with any fixings or tape?

No, as we do not know where these signs are to be installed, no fixings or tape are included.

### Can I add my logo or contact info?

Yes, on customised sign orders.

UV stable and lightweight Foam board

Various colours and thickness available on request

Polished and brushed standoffs available in 12mm

## GENERAL SIGNAGE FAQ.

### Does your cost include GST?

No, please add 10% GST onto all prices.

### Does your cost include freight?

No, but we can provide a freight quote or you can collect direct.

# ACRYLIC SIGNS 'PERSPEX/PLEXIGLAS'

**COMMON USES:** Extinguisher, Fire Blanket, Location, Hose Reel, Offences, Warning, Hydrant, Sprinkler, ID, Alarm, Warning Signs etc..

FlameStop offer Acrylic prints for your more important installations which may require a more stylish finish. Our Acrylic signs are printed on quality high gloss material with a luxury finish. The perfect professional luxury finish especially when installed with our metal stand off mounts.

## About our Acrylic signs...

### What are your Acrylic signs made from?

Our Acrylic signs are made from 3mm cast Acrylic sheets. Acrylic is a widely used, highly versatile plastic and can be used in signs because of its outstanding weather-ability, long lifespan, excellent clarity and can also be recycled easily. We stock 3mm thickness in clear and white Acrylic. And also 4mm in clear.

### How are they printed?

We direct print Acrylic using state-of-the-art UV-LED technology. For clear Acrylic signs, we can reverse print onto the back of the sheet, then print a final coat of white ink over the top. When you flip the sheet over, the result is a beautifully finished sign, where the ink remains protected behind the clear sheet itself.

### How do I install Acrylic signs?

Dependant on the location, surface and durability requirements, Acrylic can be installed using the following methods:

- Acrylic, foam or UHB double sided tape (on white acrylic only)
- Silicone or construction adhesive (on white acrylic only)
- Direct mounted with any self tapping, button, rounded or flat headed screws
- Stand-off mounts (recommended)

### Do I need lamination?

Over laminating or liquid laminating your signs will help protect against scratches, harsh weather as well extending UV life. Laminating adds approximately 1-2 years and produces a more durable 'outdoor' sign.

### What sizes can I have?

Any size, small or large, there are no limits.

### Can I have a custom shaped sign?

Yes, talk to your local representative for pricing.

### Are your signs double sided?

Our standard Acrylic signs are printed on one side only. We can print on both sides if required.

### Are your Acrylic signs waterproof?

Yes, our signs can be exposed to water and wiped clean. (Chlorine may discolour signs over time).

### Is Acrylic durable?

Acrylics highly polished surface quality is achieved by casting against glass. Acrylic has long term weather resistance with no colour discolouration allowing 92% transmission of light. Acrylic has a very good resistance to weak acids and alkalis.

Acrylic has 10x the impact resistance of glass, but will crack if impacted violently.

### Will my Acrylic sign warp?

No, Acrylic has outstanding UV resistance, temp range: Up to +75°C, +90°C short term.

### Can I have holes/rounded corners?

Yes

### Does your Acrylic come with fixings?

No, as we do not know where these signs are to be installed, no fixings or tape are included.

### Can I add my logo or contact info?

Yes, on customised sign orders.

Clear Acrylic printed underneath finished with white

White cast Acrylic available in 3mm

Polished and brushed standoffs available in 12mm

## GENERAL SIGNAGE FAQ.

### What type of signs do you make?

We can make most types of signs on a wide variety of materials.

### Can you make a customised sign?

Yes, just contact us with your specific requirements.

### Do you provide proofs?

Yes, once you place an order we can provide a proof.
