

VINYL STICKERS 'DECALS/LABELS'

COMMON USES: Extinguisher, Fire Blanket, Location, Hose Reel, Offences, Warning, Hydrant, Sprinkler, ID, Alarm & Fire Door Stickers etc..

FlameStop offer a wide range of safety stickers for the majority of your installations and requirements. Our stickers are printed on quality vinyl material with permanent adhesive for a fast and perfect install.

About our stickers...

What are your stickers made from?

Our stickers are made from high quality 3-5 year self adhesive vinyl.

How long do they remain sticky?

The permanent clear adhesive has a life of 5+ years. The rear of the sticker has a grey back to ensure you can install with no 'show through'.

How long can I keep them for?

Stickers should be stored at room temperature and applied within 6 months of purchase.

(Note: do not store inside vehicles which can get hot and adversely affect the adhesive properties).

How are they printed?

Our popular selling stickers are screen printed. Customised or short run stickers orders are printed using state-of-the-art UV-LED technology.

Will they fade in the sun?

Generally an 'unlaminated' sticker will last 1-3 years outdoors and minimum 5+ years indoors.

How do I install sticker signs?

Wash the wall or surface with soap and water, then remove any residue by wiping area with Isopropyl or Alcohol. Lift off sticker by peeling one of the corners and using squeegee firmly apply to the surface pushing out any bubbles from the centre.

Are your stickers waterproof?

Yes, our stickers can be exposed to water and wiped clean. (Chlorine may discolour signs).

Can you make reflective stickers?

Yes, we produce reflective safety class 1 & 2 stickers and can also mount onto substrates.

What sizes can I have?

Any size small or large, there are no limits.

Are your stickers durable?

Installed on a correctly prepared surface, adhesion will be excellent and should last many years without peeling.

Do I need lamination?

Printed ink can scratch if aggressively grazed. Over laminating your stickers will help protect against scratches, harsh weather as well extending UV life. Laminating adds approximately 1-2 years and produces a more durable 'outdoor' sticker.

Can I add my logo or contact info?

Yes, on customised sticker orders.

Are your stickers supplied on a roll?

No, our stickers are either supplied individually or in sheet sizes of approx A4. We plan on supplying stickers on rolls soon.

Can you print 'Fire Door' & 'Service' stickers?

Yes, see our 'Service Sticker' and 'Fire Door' information sheets.

Can you print barcodes?

Yes, we can print 'Code 39' barcodes, contact your local representative for more info and prices.

Can you print variable data?

Yes, we can print sequential numbers, names and graphics contact your local representative for more info and prices.

Can you print custom shapes?

Yes, we can print and cut any shape or size sticker you require, see our 'Service Sticker Sample' information sheet.

GENERAL SIGNAGE FAQ.

What type of signs do you make?

We can make most types of signs on a wide variety of materials.

Can you make a customised sign?

Yes, just contact us with your specific requirements.

Do you provide proofs?

Yes, once you place an order we can provide a proof.

How much does it cost?

Each sign is different, the cost depends on materials used, print process and how many you want? We can quickly quote you.

Do you install?

No sorry.

Do your signs conform to standards?

Yes, specifications and colours for our signs and stickers are produced in accordance to AS1319:1994

Can you print from my own artwork.

Yes we can print from your files (see 'Supplying Artwork Guide'). Note: conformity and compliance becomes client responsibility.

I don't have any artwork.

Simple artwork is free of charge, more complex artwork may incur an artwork fee, you will be notified in advance.

How quick can you produce my sign?

Most signs and stickers in our catalogue we keep in stock nationally. If your sticker is uncommon or customised allow 3-5 working days.

How long do your signs last?

This highly depends on where the sign is installed. Indoors, out of direct sunlight minimum 5+ years. Outside in direct sunlight 1-3 years before the sign will start to fade. We can also laminate signs to protect and extend their life by an additional 1-2 years.

Can you make signs same day?

Yes, we offer a same day turnaround and also a next day service, additional costs apply, speak to your local representative.

Does your cost include GST?

No, please add 10% GST onto all prices.

Does your cost include freight?

No, but we can provide a freight quote or you can collect direct.
